

**JODY J SNIDER**

Custom Homes

Custom to the Core

## Mission Statement:

To create a remarkable home building experience for our clients. To help them identify their dreams through careful listening and provide solutions to create a home that expresses their unique needs and wants. To create and build with efficiency, accountability and integrity, that results in lasting relationships.

## **Details**

Craftsmanship is part of the Jody Snider Custom Home's culture. Snider has created a team of experts that share his steadfast commitment to impeccable standards. Just ask any of Snider's craftsman and they proudly boast of their team's reputation for detail.

## **Design**

From structural design and architectural detailing, Jody Snider strives to create personal relationships that help us interpret your unique vision and dream. Creating spaces that are comfortable, functional and beautiful starts with good listening skills.

Once identified, *creativity and design* evolves into *planning and construction*. Whether it's modern or traditional, formal or informal, Jody Snider will design and build any architectural style you dream of. Hire your own architect, or work with one of Jody Snider's talented designers.

## **Relationship**

If you ask Snider what he loves most about his job, he'll proudly boast of the joy that comes from the relationships established from working so closely with his clients. But like any great relationship, building the dream home will have bumps in the road. The key is hard work, commitment, honesty and trust.

*“The clients involvement in the design and build process is the foundation of a true custom home. The key to creating the home where memories will be shared for generations is helping the client identify designs and options that will facilitate this goal and the first step in getting there... being a good listener.”*
